Profile

Lover of Programming, always absorbing all knowledge I can. I Have experience in C#, Java, Python, web-design, etc.., as well as libraries like OpenTK, WinForms, and much more! I enjoy working on personal projects ranging from UI/UX features to data structures, simulations, NLP mapping, and chatbots. One thing to take away from this resume about me is I am extremely hard working and I have a quick learning curve with unfamiliar topics, if you give me a chance I promise you will not be disappointed.
